Uncle Sam Greatest Owner of Coal Mines

Uncle Sam is the greatest coal owner in the world and could operate coal mines without seizing those under private owner-

United States owns 90,000,000,000 tons of coal, figures of the Department of Interior revealed today. But it's all undeveloped, with the exception of a small amount. If these vast coal properties

owned by Uncle Sam were developed they would net the United States a total ultimate income of \$5,900,000,000 and alone keep the country supplied with coal for 1,800 years at the present rate of consumption.

Only an insignificant proportion of the public coal lands has been leased for development.

Head of Baldwin Locomotive Works Declares Far East Js Buying.

By Cosmopolitan News Service. LOS ANGELES, Cal., July 22 .-Prosperity is not a potentiality; it is within our grasp."

Thus is a big stick swung on the Banquo ghost that will not down in American commerce. The speaker is Samuel M. Vauclain, president of the Baldwin Locomotive Works of Philadelphia. He came west this week with the "prosperity special"wenty huge locomotives purchased by the Southern Pacific railroad to haul the ever increasing Pacific coast traffic.

"People are always asking me when prosperity will return. I have one answer for all of them. Prosperity will not return to this country; we have it already if we

Said Vauclain:

would only recognize it. "The Far East, Japan, Russia and such countries are ready to buy and are buying."

Vauclain touched on the immigration question and contended that there should be no class distinction against the foreigner. "Why should a man say 'You can't work in my shop; you are a foreigner?' Let one just remember that, if he is a white man, there is a great chance, that there is the same kind of blood flow ing through his veins. Why should a leader of an organized group of men say who can and who cannot work. For my part, I have a reputation for keeping an open shop and

"All this trouble about double time for overtime should be done away I pay double time for over with. time for the reason I never give my nen overtime. I believe that the man who works overtime cannot give me the best service the next day and I will be the loser.

"In speaking of the strike among the railroad shopmen and the miners, who can say which is right, do know this: That in no place lobbying scandals, he was shown to the strike 100 per cent successful be receiving a salary of \$15,000 a year | One is to blame as much as the other as a lobbyist for the above-mentioned and, perhaps, the operators more so, as far as the miners are concerned

"In Europe where their trade is gone; many of the people killed in the war and conditions bad, there is optimism and content. They are thankful that they have what they have instead of everything being taken from them. "How much more reason have we

for being cheerful in this country. "When persons blame the Government for the way things are, the forget that they are a part of the Government and, in so doing are knocking themselves. It is surpris ing the way things run so smoothly from one administration to another If we don't like the way things are running, we can change it. It is the best government under the sun. Vauclain finished his talk in a ing mood and told of the way

"Work like the devil," he said, "so long and hard that you haven't time to spend what money you make and you will get rich.'
